

S8000 CABLE TYPE XHHW-2 XLP LS CT-SR, 90°C 600 V. RoHS

Description:

- 1- Compact round concentric-lay stranded aluminum alloy AA8000 conductor.
- 2- Non Hygroscopic separator tape
- 3- Cross-linked polyethylene insulation (XLP) type XHHW-2 LS CT-SR RoHS 90 °C, 600 V.

Applications:

- Branch circuits
- Electric power distribution
- Feeders
- Service
- Street lighting

Features:

- Easy to install
- Excellent grease resistance
- Excellent alkalis resistance
- Excellent atmospheric pollution resistance
- Excellent chemical substance resistance
- Excellent corrosion resistance
- Excellent gasoline resistance
- Excellent hydrocarbon resistance
- Excellent moisture resistance
- Excellent outdoor resistance
- Excellent resistance to fire propagation
- Excellent resistance to flame propagation
- Excellent resistance to vertical tray flame
- Excellent sunlight resistance
- Free of hazardous substances
- Good heat resistance
- Good low temperatures resistance
- Good mechanical resistance
- Low emission of corrosive gases
- Low emission of fumes
- Low emission of toxic gases
- Low smoke
- Low weight

Special features:

- For use in feeders or branch circuits of power or lighting in electrical installations of hotels, hospitals, buildings, malls, industrial plants, etc., in outside or inside installations.

- The product is sunlight resistant and can be installed in cable trays (4 AWG and larger), ducts, conduits or raceways.

- The product meets with the directive 2002/95/EC of the European Community; RoHS (Restrictions of Hazardous Substances).

- Meets low smoke generated test of the standard NMX-J-474, low acid gas test according to NMX-J-474 and fire-propagation test of the standard NMX-J-093. The product is marking as LS

- Meets vertical-tray flame test of the standard

- NMX-J-498-ANCE. The product is marking as CT.

- Meets sunlight-resistant test of the standard

- NMX-J-553 and the product is marking as SR.

Standard:

- NMX-J-451-ANCE

Voltage:

- 600 V

Temperature:

- Normal 90°C
- Overload 130°C
- Short circuit 250°C

Installation type:

- Auxiliary gutters
- Cable trays
- Conduit

- Directly buried
- Overhead and in Free air
- Trench
- Underground electrical ducts

Insulation:

- Cross-linked Polyethylene (XLPE)

Recommendation:

- Installation restrictions in contact with high Ph solutions.

- In order to make connections with this type of conductors it is necessary to use oxidation inhibitors and aluminum or bimetallic connectors Al-Cu.

Quality System Certification:

- ISO 9001:2015 Quality System certified by Bureau Veritas

Order additional information:

- VulcaneIT.M. S8000 Cable with XLP insulation, type XHHW-2, LS CT-SR RoHS with compact aluminum alloy AA8000 conductor, size or cross section in mm², number of product, cable length per reel and total order length.
